The course that I'm looking to pursue is Computer Science (MSc by Research) at University of BRISTOL. By studying this course, I will be able to gain invaluable in-depth and practical knowledge which will help me in starting a successful career. Moreover, getting the opportunity to study in this university will help me advance both professionally and academically. In addition, the opportunity to apply my theories and ideas in practice will benefit me to enhance my skills and knowledge and to achieve a deeper understanding of the field of programming, database systems, software engineering, computer architecture and networks. According to my research I have found that the MSc Computer Science develops future leaders who can bring data skills and insight to their profession. After reading through the modules and the learning outcome of the MSc Computer Science course, I have realised that they are conceptually invigorating and very contemporary. By studying this course, I will be able to gain the knowledge, understanding and skills relevant for pursuing a rewarding career within a globally data driven environment. Moreover, the course helps students become self-sufficient, by helping students build self-direction and personal development.
